Front

INSTALLATION

- 1 Start by loosely installing the bottom mounts using the 55mm M6 button head and the 5/8" OD spacer. When installing the rear mount, you can use the center hole as a place to re-mount the factory cargo net hook.

INSTALLATION

- 2** Next, put the factory hanger through the top mount and use the stock hardware to loosely mount it to the vehicle.

INSTALLATION

- 3** With all 3 mounts loosely installed, mount the panel to them, starting with the top mount. Once the panel is attached to all 3 mounts, adjust the positioning in the window and tighten it into place once it is in the desired position.
